### **Key Outcomes & Analysis**

#### **Success: Successful Project Migration & Core Feature Development**

The team successfully completed a significant project migration/restructuring, evidenced by the large number of deleted files (css/style.css, scripts/script.js) and new, untracked directories and configuration files. This indicates a move to a modern Next.js/React App Router structure.

**Development Progress:** Data Persistence (Simple): Was Implemented saving data to Local Storage and author for list the tasks and the column task done.
